# SWE 619 Assignment 2
# Fall 2019

**Goal:** Contract Model and Exception Handling.

Reconsider the example in Assignment 1. Modify `months` so that it handles **all** of its preconditions with exceptions. Use the standard exceptions recommended by Bloch. Document this with a revised contract. You can use JavaDoc or you can simply identify the postconditions.

**Grading Criteria:**

- Adherence to instructions.
- Preconditions are correctly converted to exceptions.
- Syntax: Java compiles and runs.
- You can earn a bonus point for supplying a decent javaDoc specification.
